Serenity among olive trees and vineyards

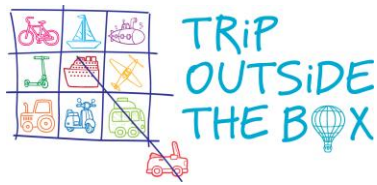

Immersed in the olive grove surrounding this former farmhouse (which was the farm of the Carthusian monastery of Escaladei) converted into an exclusive hotel, lies the new Les Oliveres Spa. The icing on the cake that makes the experience of rest and healing of body and mind in this place absolutely complete.

Built from oak and inspired by the landscape and the barrels in the estate's own winery, it immerses you in the views of the Sierra del Montsant Natural Park and the vineyards that

surround the hotel. The path of white river stones that lead to and form the surface of the spa is reminiscent, in its shape and texture, of the almonds characteristic of the area and ensures that the moment of relaxation begins the moment you step on the first stone. As if it were a river, they accompany you until you are immersed in the most absolute peace.
